"Critical Reasoning Ability and Student Well-Being"
Overview: This project examines critical thinking transfer and well-being across two courses—the Psychology of Happiness (PSYC 298D) and Adult Psychopathology (PSYC 353). We examine how experiential learning in Psychology of Happiness may improve reasoning in Adult Psychopathology, and whether experiential learning focused on improving well-being across these two courses may also impact critical thinking.
Total funding: $600
PIs: Dr. Dylan Selterman, Dr. Jessica Magidson
