

The Special Testing and Research Laboratory's Emerging Trends Program compiled the data for this report through a query of archived seizure and analysis information from drug evidence analyzed by the Drug Enforcement Administration's laboratory system. This data is representative of drug evidence seized and analyzed in the date range annotated. This is not a comprehensive list of all new psychoactive substances and is not representative of all evidence analyzed by DEA. This data is a quarterly snapshot of the new psychoactive substance market in the United States.

SYNTHETIC CANNABINOIDS

THERE WERE **6** SYNTHETIC CANNABINOID IDENTIFICATIONS IN THE FOURTH QUARTER OF CY2019. 5F-MDMB-PICA AND FUB-AMB WERE THE MOST REPORTED SYNTHETIC CANNABINOID ACCOUNTING FOR APPROXIMATELY **67%** OF THE IDENTIFICATIONS.

No new cannabinoids were reported this quarter.

BENZODIAZEPINES

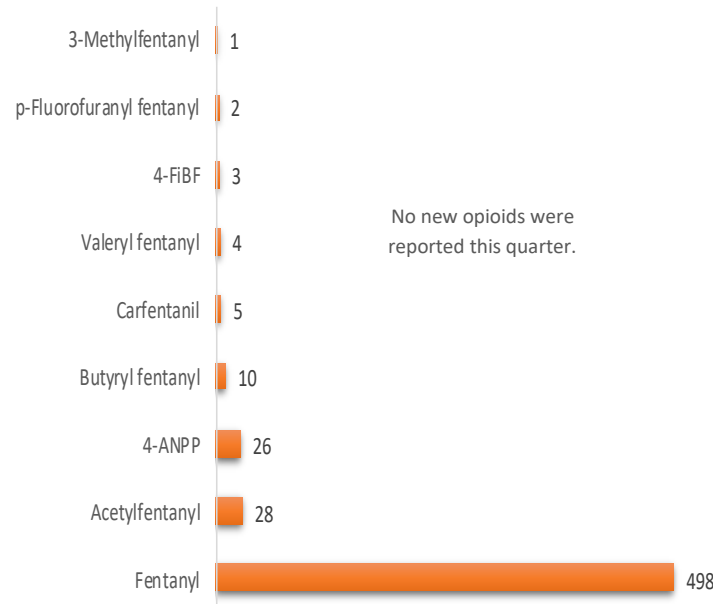

THERE WERE **8** IDENTIFICATIONS OF ETIZOLAM, **7** IDENTIFICATIONS OF FLUALPRAZOLAM, **1** IDENTIFICATION OF CLONAZOLAM AND **1** IDENTIFICATION OF FLUBROMAZOLAM THIS REPORTING PERIOD.

The term new psychoactive substance (NPS) describes a recently emerged drug that may pose a public health threat. This includes synthetic cannabinoids, substituted cathinones, phenethylamines, opioids, tryptamines, benzodiazepines, and a variety of other chemical classes. Due to the increase in seizures, fentanyl is also included in this report.

An identification is made when authenticated reference material is available for comparison. When reference material is not available, the drug evidence is identified as "substance unconfirmed."

OPIOIDS/ANALGESICS

THERE WERE **577** IDENTIFICATIONS OF FENTANYL, FENTANYL-RELATED COMPOUNDS, AND OTHER NEW OPIOIDS. FENTANYL ACCOUNTED FOR **86%** OF THE OPIOID IDENTIFICATIONS. OF THE **498** IDENTIFICATIONS, FENTANYL WAS FOUND AS THE ONLY CONTROLLED SUBSTANCE IN **48%** OF THE IDENTIFICATIONS AND WITH HEROIN IN APPROXIMATELY **38%** OF THE IDENTIFICATIONS. ACETYLFENTANYL WAS THE NEXT MOST PROMINENT SUBSTANCE IDENTIFIED, ACCOUNTING FOR APPROXIMATELY **5%** OF THE IDENTIFICATIONS.

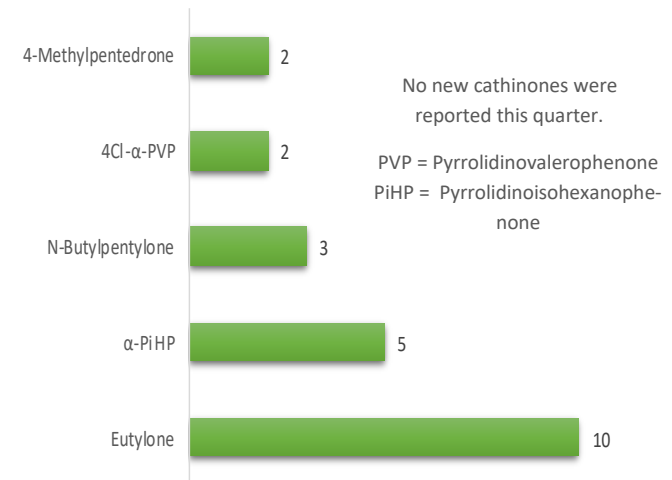

No new opioids were reported this quarter.

A single unit of drug evidence may have multiple sub-units. For the purposes of this document, each unit of drug evidence counts as one identification regardless of the number of sub-units. Some seized drug evidence contains more than one active ingredient; therefore, more than one identification can be made for a single unit.

CATHINONES

THERE WERE **22** CATHINONE IDENTIFICATIONS THIS REPORTING PERIOD. EUTYLONE WAS THE MOST REPORTED CATHINONE ACCOUNTING FOR APPROXIMATELY **45%** OF THE IDENTIFICATIONS.

No new cathinones were reported this quarter.

PVP = Pyrrolidinovalerophenone
PiHP = Pyrrolidinoisohexanophenone

OTHER

The "other" category includes substances that could not be confirmed, psychoactive plants, PCP related substances, benzofurans, hallucinogens, tryptamines, and amphetamines.

THERE WERE **17** INSTANCES OF AN INCONCLUSIVE SUBSTANCE REPORTED DURING THIS QUARTER.
